# WATER IS ENOUGH

Fabrics with advanced integrated protection that enables you to clean away the majority of domestic dirt and stains with just water.

- You don't have to remove the sofa covers.
- There's no wear and tear on the fabric in the washing machine.
- So you can show off your sofa. Goodbye to those fabric protectors!

## TECHNICAL GUARANTEES

This label certifies the environmentally friendly production process which respects human rights and guarantees the absence of any products that could damage human health.

OEKO-TEX Standard 100 is an international safety certification system that guarantees textiles are free from any harmful chemical products.

The fabric also incorporates a shield which prevents the presence of dust mites, fungi and bacteria. These agents cause allergies and other related conditions

High Performance Upholstery

#### JUST CLEAN IT WITH WATER

The protective layer that's incorporated into each and every fibre means that stains can be removed without having to use any type of cleaning product that could actually damage the fabric. All you need is a cloth and a bit of water.

#### 100% BREATHABLE

The air can circulate on the surface which is the best way to let your sofa "breathe" so that it's always fresh and aired.

#### 100% ECOLOGICAL

It is certified by the Oeko-Tex Standard 100 which guarantees it doesn't contain any products that could damage the environment.

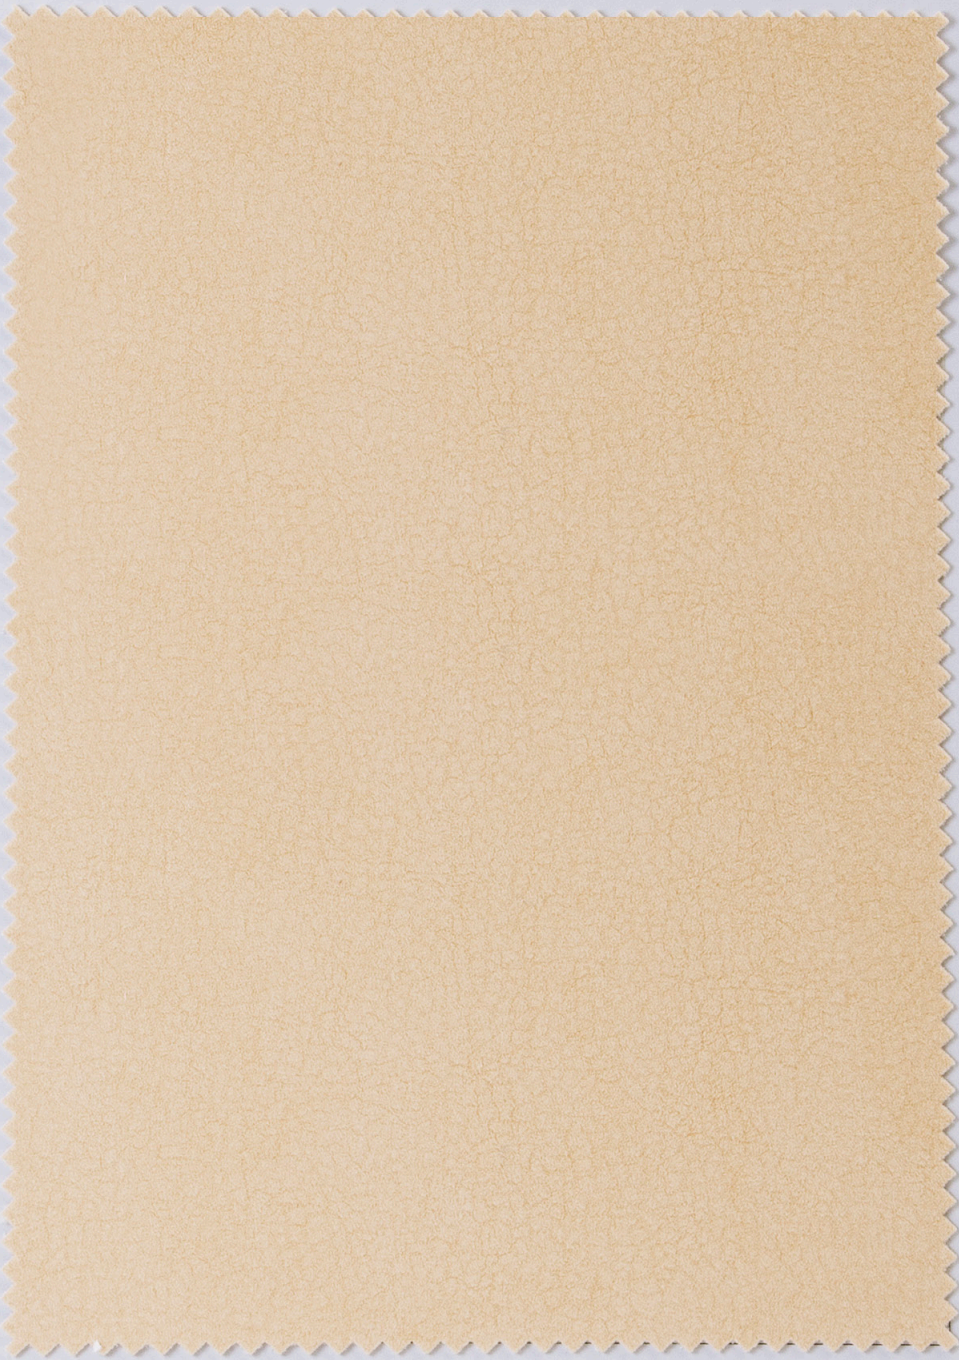

#### OPTIMUM RESISTANCE

The strongest seams and the ultimate defence against wear and tear make it one of the most reliable types of upholstery on the market.
